Bring a microforms collection into the digital world

The ScanPro uses the latest digital technologies to provide powerful features not found in any other microfilm equipment. These features make the ScanPro microfilm scanner so easy-to-use, fast-to-operate, and versatile that leading research and academic universities are integrating it into their operations to make the most of their microforms investment. See the video to learn more: http://www.e-imagedata.com/ScanPro_1000.htm

View all the information stored on your microforms

The ScanPro 2000 features single zoom lenses 7X to 54X or 7X to 105X which means you don't have to stop your look-ups to change lenses.

Complete a high resolution scan in ONE second

Complete a high resolution scan at any magnification in ONE second with just "a single click" making it possible to complete your look-ups and research quickly and efficiently.

Customizable toolbar with save & recall settings

Customize the ScanPro toolbar using just the features needed for your application. Save those settings and recall them when you next use that same application.

Microfilm Information At Your Finger Tips

With the ScanPro 2000 you can use the latest touch screen technology to easily bring the information stored on microforms into the digital world with just the touch of your finger.

Scan All of Your Microforms

The Microfilm ScanPro 2000 is the perfect viewer/printer/scanner for all of your microforms, Fiche, Roll Film, Micro Opaques, Micro Books, Ultra Fiche, Cartridge film, and Aperture Cards.

And, the Microfilm ScanPro 2000 utilizes combination carriers that remain on the ScanPro when changing film types. These carriers are designed to avoid film scratching, built for public use applications, and feature ball bearing guides with an integrated precision digital roll film controller to provide exceptional film positioning control.

Features and Benefits

- High resolution scan of your microfilm in just ONE second.
- Single Zoom lenses serve 7X to 54X or 7X to 105X.
- Time saving automatic features such as brightness, focus contrast, image straightening, image cropping, and zoom.
