# The Money Machine™

## Enhances Customer Service and Brings People to your Branch

With its eye-catching design, ease of use and super-fast coin counting, The Money Machine enhances customer service, helps attract and retain customers/members, and differentiates your financial institution. Staff productivity is also increased, freeing staff to process additional transactions and cross-sell services, contributing towards higher profitability.

### Enhanced Customer Service

The Money Machine is extremely fast, easy and fun to use! Your customers simply pour their coins into the coin tray and push one button on the colorful touch-screen display. Within seconds, their coins are counted by the fastest coin sorter in the industry. They take their receipt to your staff for conversion to cash or account deposit.

### Revenue Growth Opportunity

The Money Machine can help grow your core deposits as customers/members respond to the convenience of counting and immediately depositing their coin. The Money Machine can also bring in new accountholders.

An added revenue stream is the collection of transaction fees, which are determined by your institution - for example, accountholders and non-accountholders may be charged different fees. Depending on the percentage you select and the volume processed, The Money Machine can quickly pay for itself. You can adjust the service fee percentage at any time, providing you flexibility on your return-on-investment and/or promotional or competitive positioning.

### Increased Staff Productivity

By having customers count their own coins, you reduce teller lines and free staff from time-consuming deposits, allowing them to be increasingly productive by processing additional transactions and promoting other services.

Customer transactions are virtually uninterrupted with either the high-capacity bin unit or the bag version with as many as 12 high-volume bags. Both versions also minimize the number of times your staff attends to the unit.

### The Money Machine also provides:

**High Speed Processing.** At speeds as fast as 4,100 coins-per-minute, The Money Machine boasts the fastest coin sorting in the industry.

### Advanced Debris

**Management.** Debris such as paper clips, screws, bolts and bent coin is diverted to a debris cup for easy disposal.

**Continuous Suspect Coin Detection.** With this option, suspect coins are uncounted and diverted to a coin return cup while maintaining the unmatched coin sorting speed.

**Industry Proven Reliability.** The Money Machine uses the same JetSort® heavy-duty coin processing mechanism as used in the most demanding coin applications: casinos, armored car services, and large cash vaults.

**Transaction Memory & Reporting.** Up to 65,000 transactions are stored in The Money Machine memory. Daily reports can be easily obtained at any time by authorized employees (up to 100 passwords).

**Customizable Screen Display.** Customized graphic can be placed on the initial customer greeting screen. Text can be customized with specific phrases such as service fee amounts and fee disclaimers.

**Customizable Transaction Receipt.** Up to four lines of text can be printed on both the top and bottom of the customer receipt. Typically, the service fee is also indicated on the receipt. In addition, your logo may be printed on the receipt.

**PC-Based.** Windows XP, 40 GB hard drive PC is built into The Money Machine, providing a flexible platform for management control.

**Uninterruptible Power Supply (UPS).** In the event of a power failure, the current transaction is ended and a receipt prints. No data is lost.

# The Money Machine™

## Customer Benefits

**Colorful 15" LCD display provides versatility and ease-of-use for customers and staff alike.**

**Fast!** An unprecedented speed as fast as 4,100 coins per minute.

**Easy & Fun to Use!** The colorful touch-screen display provides simple instructions and adds to the fun experience of using The Money Machine.

**Reliable!** Robust, proven technology provides outstanding accuracy and reliability, ensuring customer satisfaction and repeat visits.

**Flexible!** Customers can count their coins at their convenience without waiting in teller lines.

## Cummins offers both bin and bag collection systems so you can choose the one that's right for you

### Bin Collection System

Coins are counted by denomination and collected using a single, secure bin with a capacity of approximately 58,000 mixed coins – promoting fewer transaction disruptions.

### Bag Collection System

Each denomination is counted and sorted into separate bags that require no further processing. Up to 12 high-volume bags minimize the chance that a customer's transaction will be disrupted by a full-bag situation. Colored LED lights on bag position match standard coin wrap colors.

### Through the Wall Installation

Both bin and bag versions of the Money Machine are available in a through-the-wall configuration. All operator controls and coins are accessed behind the wall – providing greater security and behind the scenes coin management.

## Machine Management... Simplified

### Warning light

This optional accessory alerts your staff when the Money Machine needs attention. A yellow light illuminates as your bin or bags approach their

capacity; a red light alerts your staff that a bin or bag is full – the Money Machine's status can be observed from across the room and potential transaction interruptions are avoided.

### Bag Management Screen

Your staff can easily see the status of all bags and identify which need to be changed.

### Signage & Graphics

The Money Machine Coin Kiosk is available with eye-catching graphics that demand attention and increase usage. Options include machine panel graphics, and curved signage with backlit header.

Shown with optional signage, graphics and backlit header.

### Specifications\*

**Coins Sorted:** 1c, 5c, 10c, 25c, 50c and \$1

**Sorting Speed:** Over 4,100 coins per minute

**Sorting Accuracy:** 99.995+%

**Input Tray:** Gravity flow tray with magnets

#### Capacity:

**Bin Unit:** Bin holds up to 58,000 mixed coins

**Bag Unit:** Bag Unit: Up to 12 high-volume (full Federal Reserve size) bags: \*2 or 4 penny, 2 nickel, 2 dime, \*2 or 4 quarter, 1 half dollar, 1 dollar

*\*The Money Machine can accommodate either 4 bags for pennies OR 4 bags for quarters. No models are available with both 4 penny bags AND 4 quarter bags.*

#### Approximate Dimensions:

27" W x 29" D x 56" H (80" high with optional signage & backlit header)

Compact footprint occupies a small space, but provides big benefits.

**Power:** Voltage operating ranges are either 105-130v or 198-253v. Frequency is 60/50Hz. Customer must provide an electrical supply properly grounded and protected by a circuit breaker in accordance with applicable electrical code. This equipment must be plugged into a properly grounded outlet. To obtain the best results, Cummins recommends using this equipment in conjunction with a dedicated AC power line.

Power consumption (full load amps) at nominal voltage: 9.0 Amps (120v); 4.5 Amps (220v). Power disruptions that result in input voltage other than the power requirements listed can lead to improper operation of this device or result in failure/damage to electrical components. (Power disruptions are not covered under machine warranty or preventative maintenance agreement.) Power conditioning/stabilizing devices are available through Cummins.
